

Methow Recycles Battery Recycling

We accept most household batteries

This includes rechargeable and single-use batteries, lithium batteries, laptop batteries, and small lead acid batteries up to 12 volts.

Please no car batteries

However, Napa Auto Parts in Twisp DOES accept car batteries!

Battery recycling costs \$2 per lb

As part of our new battery recycling program, and to ensure that every battery you drop off is properly recycled, we now must charge for battery recycling. Thanks for your understanding and support!

Please no damaged batteries

No corroded batteries, leaking terminals, or recalled batteries.

Please no batteries heavier than 11 lbs

Sorry, but we are unable to accept batteries that weigh more than 11 lbs.

**IT'S WHAT
WE DO HERE.**
